

Quality Policy

The business mission of Ganz Transformers and Electric Rotating Machines Ltd. is the planning, manufacturing and sales of custom built electric machines which preserve and strengthen the more than 100 years old heritage of Hungarian engineering.

We pursue the strengthening of honest and mutually beneficial business relationships with all interested parties, strengthening our international status, while keeping the interests of the owner in our mind. Therefore, we consider providing products and services that meet customer and regulatory requirements our primary duty.

The organization is committed to comply with the requirements of the Integrated Management System and continuously improve the system in order to ensure continuous quality of the products and services. The primary quality characteristics of our products are reliability, long operation lifetime and high availability. We are committed to ensure that safety related quality aspects are not compromised during the design, manufacturing, delivery and control of products and services which are designed to operate in special environment (nuclear environment or potentially explosive atmosphere).

One of the most valuable asset of the organization is its human resource, therefore, we make an effort to continuously develop our personnel.
