

GENERATOR SOLUTIONS FOR HIGH VOLTAGE & HIGH POWER TEST LABORATORY

SINCE 1878

GANZ offers motor & generator sets:

- for power transformer testing (frequency range 50 – 200 Hz)
- to produce short circuit power
- for power supply with high inertia

GANZ scope to be delivered:

1. Rotating machine group including driving motor & generator
2. Oil lubrication system for rotating machine group
3. Frequency drive for driving motor with step up and/or step down transformer
4. Excitation electronic for main generator
5. Protection relay
6. Measuring current transformers
7. Installation of rotating machines
8. Installation and commissioning of excitation electronic and protection relay
